REACH Position Statement

The Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) regulation (EC) No 1907/2006 is chemicals legislation applicable in all EU Member States as well as the EFTA European Economic Area (EEA) countries Norway, Liechtenstein and Iceland.

The regulatory framework establishes specific requirements for a phased approach to occur over a period of eleven years, to be fully implemented by 2018. JDSU currently fulfills and will continue to fulfill all its obligations under REACH as they enter into force.

JDSU is affected by the REACH regulation as a supplier of articles.

JDSU declares that substances included in the Candidate List of Substances of Very High Concern (SVHC) are not used in articles shipped by JDSU in concentrations above 0.1% weight by weight. JDSU monitors any new substance entries in the Candidate List published by the European Chemical Agency. This declaration is, therefore, subject to regular review based on any changes to the Candidate List. In the event an addition to the Candidate List causes any JDSU article to exceed the 0.1% by weight threshold, JDSU will list those articles in an appendix to this statement.

JDSU's Optical Security and Performance Products Group has established an "only representative" in the European Community and has completed the necessary pre-registration process in the event its products are classified as preparations rather than articles. This will ensure an uninterrupted supply of products to our European customers.
