

RoHS-Declaration of Conformity

The directive 2011/65/EU (new RoHS directive) requires slight changes for the limitation of hazardous substances in products.

From an outside view the biggest change is the declaration itself. From the 2nd of January 2013 on RoHS is part of the CE declaration.

By printing "CE" on products it is declared that the requirements for RoHS are fulfilled.

A written confirmation is provided with the EC declaration of conformity.

For the declaration of conformity with the RoHS directive 2011/65/EU no separate document is required.

The new RoHS directive therefore was added to the Tridonic EC Declaration of Conformity for the single product ranges.
